

SERIES 8 - Bathroom heaters

The favoured choice for bathroom interiors.

Series 8 Slimline model K4N heaters have been designed and manufactured to a very high specification for use in bathrooms for residential and commercial properties.

These heaters are fully galvanised to avoid rusting; they are also stylishly constructed and elegantly finished in pure white. A range of custom designed thermostatic controls are available to create specific control options.

Features:

- Slimline design saving space
- Created for wet areas – totally safe
- Fully galvanised to avoid rusting
- Output sizes from 500 Watt to 1000 Watt
- BEAB approved to splashproof standard IP24
- Equipotential earth bonding terminal provided
- Overheat cut-out facility
- Fully tamperproofed
