

SERIES 8 - Model C4E

The C4E heater from NOBO Heating UK is an aesthetically pleasing, modern hybrid heater with a quality feel.

Taking styling from both Series 8 and Series 14, the C4E heater has a design that is the best of both worlds - the attractive front air outlets are taken from the Series 8 range and the simple, easy to use temperature control taken from the Series 14 E4EN model finishes off this high quality panel heater.

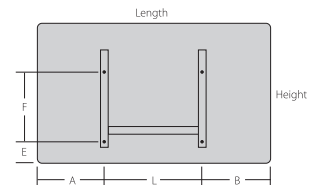

The C4E incorporates simple, accurate technology whilst maintaining a low capital investment status – ideal for developers seeking a high quality product for both domestic and commercial applications.

Features:

- Splash proof to IP24
- Overheat safety cut out
- Safety conscious smooth rounded corner profiles
- Available in 6 output ratings between 500 watt and 2000 watt
- Attractive front air outlets
- Completely silent electronic thermostat
- Variable temperature control from 5°C to 30°C
